Mystery of Store Burglary Was Solved Last Week

Young Lads From Blairmore Entered Store and Stole They Took Cigarettes, But No Hama or Geese.

The robbery reported in last week's Journal, of the Co-Operative Store over the week end of Oct. 15-17, was traced to four small boys ranging in age from 11 to 15 years. Being juveniles, their names were not disclosed by the court, but they were given a good lesson by Magistrate Graham.

With so many juvenile robberies reported from various places, it appears that this class of offence is on the increase, and people sometimes ask if it is gangster picture which influences young people.

It is a serious sort of affairs when young boys forcibly enter places and steal, and possibly the good old-fashioned method of a good strapping would teach them a lesson that would be long remembered. Parental influence needs to be exercised strongly on such youthful offenders, for these first lapses if unchecked may easily lead to more serious offences as the boys grow older.

A CHEERFUL CALLER

A colored gentleman walked into the office, with a loaf of bread making a bulge in his coat. All smiles, he displayed a couple of small trays of neat little buttered broches. Not wishing to buy one, each passed him over a dime. Oh, take one for the kids, he smilingly urged, as if to give something in return for the small contribution towards a square meal. Asked where he came from, he stated he had breezed through from British Columbia, and cheerfully remarked that sometimes a fellow is up and sometimes down, that you never can tell when the forces of adversity might strike you, no matter how safe you may feel at the moment. As a parting shot he said he hoped he wouldn't land in Ponoka. However, the speaker that sat down was, his trying to make some return, however small, for the dime he gets along the road. The man who was taking it with a smile, which doubtless would help him along far better than if he came around with a frown against the world and everybody in it.

Sports Notes

HOCKEY SEASON TICKETS
NOW ON SALE

Season tickets for all home games of the Canadians went on sale at McBurney's Drug Store during the week end. A number of enthusiastic fans have already secured their tickets and reserved their favorite seats. Advantage of having a season ticket at \$1.50 per pay is also being taken by several of the miners. Miners can take advantage of the latter offer by making application at either one of the company's time offices.

ARENA HARD-SURFACING PROGRESSING

Work of hard-surfacing the arena is progressing. Gravel hauling was practically completed Wednesday afternoon, while a large portion of the arena had been levelled and rolled. Other material necessary is expected to be hauled to the arena within the next few days and the work completed early in November.

HOCKEY POPULAR GAME IN SCOTLAND

Hockey, with its speed and thrills, has spread to Scotland, where it is rapidly becoming big business. This week a copy of the Pict Free Press was received and shows an artist's conception of the \$40,000 (\$200,000) arena which opened recently at Kirkcaldy, Scotland.

The team, known as the "Fife Flyers," has three home games scheduled for this week. The first game, Tommy Durrill hall from North Battleford, Saskatchewan. Another player, Jimmy Chappell, played for the Flyers when they won the world's title from Canada at the Olympic games.

In addition to the rink, which accommodates 4,000 people, there are a confectioner's and tobacconist's shop, general office, booking office, board room, and a room for smoking, spray baths, curlers' quarters and other conveniences too numerous to mention.

The game gives one a good impression of how hockey has taken hold in the Kingdom of Fife, where leagues now flourish.

TRAIL TO TOUR EUROPE

All difficulties have been cleared away and Trail will make its tour of Britain and Europe. Uncertainty had clouded Trail's chances of making the European tour until the day when word from the British Ice Association wired that the tour would definitely take place.

Trail will take the team that won the Allan Cup, with one exception, on the trip. Dave Duchak, now coach of the Calgary Stampede, will replace the trip. Joe Benoit, training with the Amers; McCready, who failed to place with Toronto, and Dick Rowan, who is not expected to make the grade with Boston, will all return to Trail and join the Smoke Eaters on the tour.

Trail will play Lethbridge an exhibition game in November at Lethbridge, when it is expected a number of local fans will have the opportunity of motoring to the city to size up the Leaf machine for the coming season.

Young Man Arrested at Moosomin Brought Back Here Wednesday

Former Trusted Employee Makes Unhindered Departure With Employer's Car; Sold it in Manitoba.

Following the description of Herman Hersh being circulated by the R.C.M.P. following his disappearance from Coleman on October 17, when he was sent to Bellevue on a business call by his employer, F. B. Van Duzee, he was arrested five days later, October 22, at Moosomin, Sask., near the Manitoba border.

The car it is alleged had been sold, and was traced to Portage la Prairie, where it was recovered by Mr. Van Duzee, who left here on the morning after being informed by the police of Hersh's arrest.

Hersh was brought back by Constable H. Humphrey, of the Blairmore sub-division, R.C.M.P., who left here on Sunday for that purpose. This is young Hersh's first offence, and until he appears before a justice magistrate, it is not known what his defence will be for absconding with the car. His mother, Mrs. Harry Gee, and his step-father, have lived here for about three years, having come from East End, Saskatchewan. Mr. Gee follows his trade as a carpenter.

LOCAL AND GENERAL

Included in the Blairmore contingent at the Board of Trade banquet were L. L. Morgan, W. H. Chappell, M. R. Condon, A. R. Granger and J. Smith. The latter was a member of West Canadian Collieries Ltd.

The Misses Margaret and Alwyn McLeod, and Howard, were week-end visitors here, the guests of their grandparents, Mr. and Mrs. Andrew McLeod.

Legionaires Prepare for Poppy Day and Remembrance Day

Will Have Poppies on Sale Next Saturday; Memorial Service on Friday, November 11, in Community Hall.

A meeting of the Coleman Branch of the Canadian Legion was held on Tuesday evening, with Bert Garret, president, in the chair.

On the order of business, Saturday being the only day before Remembrance Day, it was decided to hold the annual poppy day sale on that day. The executive will handle the sale of poppies, and they will be sold at the bank and members will sell at the business section. The homes will be canvassed by girls of the Legion Auxiliary. The large poppies will be sold at 25c and the buttonholes for 15c. There may be other emblems. All these poppies are made by disabled veterans in the Veterans' camps in various cities of the Dominion. Profits are therefore used for worthy purposes. All are urged to buy as liberally as possible.

REMEMBRANCE DAY SERVICE

They will open at 10 a.m. in the Community Hall. Ex-servicemen will meet at the fire hall at 9.30 to parade to the hall. All the residents are invited to assist in the service, including the Salvation Army. Further particulars will be given as the arrangements have been completed.

Secretary of Community Hall Committee Resigns After 5 Years

Decides it is Time that Responsibility Was Assumed by Local Organizations Who Use Hall for Activities.

The resignation of H. T. Halliwell as secretary and manager of the Community Hall Committee, has been handed in to what is left of the committee. In 1933 a committee of trustees was formed, of which Mr. Moosomin Mayor Pattinson and Dave Gillespie, signed a lease for 20 years, whereby the United Mine Workers of America agreed to turn over the hall to the committee with provision that taxes and maintenance of the hall should be met. H. T. Halliwell voluntarily acted as secretary of request of the committee.

Liberal concessions were made by the coal and light and water companies to enable the hall to be carried on. For dances, \$15 for concerts and \$10 for meetings. Many people thought because it was named a community hall it could be rented for little or next to nothing, but it was only from rentals that the costs outlined above, could be met.

As there is only one trustee left (Mayor Pattinson), it is not yet known what arrangements will be made for the carrying on of the committee's work. The present secretary has decided it is time for someone else to take the responsibility, and has suggested that a committee be formed from among the people of the organizations that use the hall, and that they assume the responsibility of carrying on.

The town council has been advised of the secretary's resignation to take effect immediately. It has been suggested that Coleman Miners' Association take it over, but they decline to do so, claiming the hall was in the first place paid for by the miners when it was built over 30 years ago, and that title deeds should be held by the officers of District 18, U.M.W.A. If the title deeds were in their possession, there is a possibility the local association would consider plans for carrying on the hall.

As it stands at present, it is an unwanted child with nobody caring to adopt it.

GONE TO KIRKLAND LAKE

J. H. Peel (not the "de" Ken John Peel" fame) has left the Pass, after several years here as the popular representative of the Metropolitan Life Assurance Co. Always pleasant in his business relations, and also efficient in promoting business, his company's ability has been recognized in his promotion to a wider field of work. There is no doubt that with his pleasing personality and tact in dealing with the public, he will succeed in his vocation, and good wishes follow Mr. Peel and himself in their new home. They were guests of honor at various social functions before leaving.

STILL SUFFERING FROM INJURIES

Harry Parkinson went to Calgary on Sunday for further medical examination under the Compensation Board, his back having been injured over 18 months ago in a fall of coal at international mine. At that time he had a miraculous escape from death, being buried under a mass of fine coal, and only the prompt action of his partner scraping away the coal from around his head, allowing him to get air, saved his life.

Board of Trade Banquet and Rally Heartily Enjoyed--C. E. Stockdill's Address on Value of Board of Trade--Lorne A. Campbell's Remarks Arouse Interest--Mayor Thanks Speakers

Business and professional men of Alberta and the Canmore district, the Boards of Trade in the Pass, met at the banquet table at the Grand Union hotel on Monday evening to listen to a great speaker, Mr. C. E. Stockdill, president of the vice-president of the C.P.R., and a past president of the Winnipeg Board of Trade. Mr. H. T. Halliwell, president of Coleman Board of Trade, was chairman and introduced the various speakers, of whom were Mr. Geo. Kellock, Mr. Stockdill, Mr. Morgan, president of Blairmore Board of Trade; and Rev. R. Upton, minister, on behalf of the Bellevue delegation.

Mr. Halliwell, before launching on his remarks, focused the spotlight on a number of men present who play an important part in the mining industry in the Pass, as well as several executives who were present from distant points. In his address, he stated that the Board of Trade had been dormant for some time and asserted that a lack of objective opinion was the cause. A Board of Trade could not function with one or two men; it required the co-operation of the community. The accomplishments could be made through the efforts of a Board of Trade and he cited the western world as an example. He introduced Mr. Geo. Kellock, vice president of McGillivray and international companies, as the next speaker.

Mr. Kellock paid tribute to Mr. Stockdill's work with the western coal operators. He had known the great speaker for many years. Mr. Stockdill had handled the C. P. R. western fuel requirements in 1916-17 and to him goes the credit for taking the western world further east than had previously been the case. He had first made it possible to take coal from the west to the east, and the western coal market to Winnipeg and Kenora, until the present day western coal is hauled to win a profit. Mr. Kellock brought to the meeting a note that it was Mr. Stockdill who had introduced the Board of Trade brief before the town commission. Mr. Halliwell then introduced Mr. Stockdill as the guest speaker to Coleman. Mr. Kellock then introduced Mr. Stockdill to the gathering.

Mr. Stockdill remarked that when he received the invitation to come to Coleman he did so with mixed feelings. He labored under the impression that perhaps the coal operators of the Pass did not think that his company's coal orders were equitable, but that for that reason he wondered what his reception would be.

He first became acquainted with the Pass when he was secretary for Mr. G. J. Burg and was still with that gentleman when word was received at the company's offices that he was to be transferred to Frank, with the loss of many lives.

He fully realized that the livelihood of the Crows' Nest Pass towns depended entirely upon the coal industry. He spoke of the markets 20 years ago and the present day market. He blamed the declining orders that were the cause of the mines, that grade of coal being used extensively in steam plants. Bituminous coal mines now depended more on the transportation companies for their market. The C.P.R. had not been able to take up the slack in the grade of coal in the market, but were doing their utmost to do so. In 1923 western coal supplied 67.2% of his company's requirements. In 1937 they supplied 93.3%. The mines supplying this amount were located in southeastern B.C.; south-

He urged the Associated Boards of Trade throughout Canada to work in co-operation with the Canadian Chamber of Commerce. Canada, he asserted, was a great country, rich in natural resources, but true development would only come by Boards of Trade and the Canadian Chamber of Commerce working together.

He stated that the basis of the brief that he had entrusted to present to the Rowell commission was that all citizens of Canada should have certain mining rights. Providing a person was a citizen of Canada, there was no reason why they should not move from one part of the country to another without being asked questions from various provincial authorities.

Lorne A. Campbell, in his opening remarks, stated that he had taken an active part in Coleman in 1910. He had been active in Board of Trade work for 40 years. He had organized the Board of Trade in British Columbia and later helped combine those Boards of Trade into an Associated Boards of Trade.

He related how in past years the coal made at Michel was being exported to the States, regardless of the fact that home consumption was more than able to absorb the Michel

production. Agitation was made to the provincial and federal governments by the Associated Boards of Trade and the matter was rectified. The agitation was also responsible for Coleman's coke ovens being built and though it was claimed the ash content was higher than other coals, research work found means of using the local coke to better advantage.

He also gave credit to the Associated Boards of Trade for having the reputation of being the "Crows' Nest black surfaced." This road is 60% black-surfaced. He suggested that it must be to join the B. C. Associated Boards and agitate for a black-surfaced road to be built from the town to the present hard-surfaced road. This would be a valuable aid to tourists, and its accompanying advantages.

In dealing with truck and bus traffic, he lashed out at those people who knew full well that their livelihood was in the hands of the industry, but who continued to patronize trucks and buses. Speaking directly to Mr. Stockdill and Mr. Rutherford, district superintendent of the Lethbridge sub-division, he urged that lighter equipment on this route and more frequent runs be made to the highway to compete more favorably with trucks.

Trucks and buses ran smoothly through the good weather months, but when snow tied up the highways, the railways are expected to keep up schedule while trucks and buses are stalled at their depots. Meanwhile the railway companies are expected to handle all freight that had previously been assigned to the trucks and are expected to get it to its destination on schedule.

Mayor George Pattinson extended a vote of thanks to the speakers and commented that the Lethbridge Board of Trade in the progress of Lethbridge. He cited instances in past years when the progress of Lethbridge had grown to its present proportions, that Winnipeg papers often carried news and news of Lethbridge's progress and he gave credit to that constant publicity for helping Lethbridge to the position it now occupies. A weekly paper was an asset to a town. A weekly recording the progressive spirit of the town lends greater publicity for the town by the outlet given by daily papers who often reprint extracts from them.

HOW MANY DO THE SAME?

Walking home one night with a neighbor, the drone of the trans-Canada mail plane caused us to look at each other like storks moving rapidly across the firmament.

"I often come out of the house when I hear it coming, and follow its track," said my neighbor, "I can see it from sight," remarked the neighbor.

The writer confessed to doing the same thing, and likely many others. Hundreds of others of older people who still regard with fascination and awe the spectacle of these large planes winging their way over high mountain ranges as regularly as if they were on a railroad schedule. Of course they and snow may occasionally halt their progress, but it makes one realize that air travel is still something wonderful.

LOCAL NEWS

Mayor and Mrs. George Pattinson were visitors to Lethbridge on Tuesday evening. Mr. E. D. Alexander accompanied them.

Mrs. Titina Rizzo, young Coleman singer, was heard over a Calgary radio station on Saturday evening. Her song was awarded second prize on an amateur program.

Detailed Report of B. of Trade Address by Mr. Stockdill

Mr. Chairman, etc.

Ever since the suggestion was made by you last spring that on one of my trips to the west I might stop over and inflict an address upon a gathering of representative men of the cause Board of Trade in British Columbia and later helped combine those Boards of Trade into an Associated Boards of Trade.

Since my active association with the Winnipeg Board of Trade, particularly that period during which I served as president, I have come to appreciate the obligations and responsibilities of Board of Trade members and the value to the community which it is possible for members with enthusiasm and initiative to render. I, therefore, enjoy meeting the members of Board of Trade who are attempting to make a better world for themselves and their communities.

On the other hand, having had for some years a certain responsibility connection with the making of contracts for coal required by the Canadian Pacific Railway for the west, I was a little uncertain as to the reception which might be accorded me.

I have heard vague rumors of suggestions that our coal orders are not equitably distributed, and on that account I might not be very welcome in this part of Alberta, but when I remembered the pleasant meetings I had in my office with representatives of the various coal companies of this general neighborhood, and the very cordial attitude which they take towards each other, indicating at no time a desire to secure any advantage for themselves, I was relieved of concern as to my reception were quickly dispelled.

I am, therefore, very pleased to be here and to be able to share my thoughts audibly for a while.

My first contact, and that indirect and remote, with the Crows' Nest Pass was in the early part of 1905, at the time of that great tragedy which befell the town of Frank when the port of the Turle Mountain slipped off and created such havoc with the loss of so many valuable lives. I was at that time located at North Bay, writing a short-handled for the now Sir George, then general superintendent. (Continued on Page 4)

MILD, COOL AND
SLOW-BURNING
-THAT'S DIXIE!

DIXIE
PLUG SMOKING TOBACCO

The Plight Of Youth

The phenomenon of young, unemployed men in large numbers wandering aimlessly all over the country in the past two or three months, some of them honestly looking for work and others professedly searching for jobs but hoping to avoid them, has been termed, and not without warrant, a "national disgrace."

There cannot but be sympathy for these youths. Many of them are offspring of thirty, hard-working parents. Many of them are fairly well educated, some even holding university degrees. Some of them are well equipped to occupy an honored place in the business and social life of the country and have the right attitude towards work, but they find that industry does not want them, that there is no place in the crowded ranks where they can fit in.

On the other hand, the ranks of these idle, footloose youth include some who are more shifty than thirty, some who prefer to shirk rather than work, and some who are outright morons and ne'er-do-wells. Unfortunately, in the minds of a section of the general public, there is an inclination to include all of them in the latter category, and this tends to make the lot of those who are willing and eager to work and who are unable to do so through no fault of their own, harder to bear.

Unless something is done to enable these young men to find their place in the social and business life of the country, and particularly those who by upbringing, education and inclination are worthy material for citizenship, their ultimate fate is difficult to predict, beyond the general statement that it can hardly be expected to be creditable for themselves, their forebears or their country.

Action Is Needed

As stated at the outset, one cannot help but be sympathetic towards these youth and grieved at the predicament in which they find themselves, but sympathy alone is not sufficient. Sympathy must be translated into practical action if mental, moral and physical disaster is not to be the goal towards which they press. In other words, a helping hand must be extended, if not by private effort, by the governments of the country.

On the face of it the problem seems insoluble until such times as industry has sufficiently recovered from the slings and arrows of misfortune to enable it to absorb them. The only other solution, temporary or otherwise, is for the governments of the country to do something more than is now being done.

It will be argued, of course, that in the west, the federal government has made some provision to take care of these benighted youth by establishing the farm bonus plan and in providing the funds for the operation of youth training classes in the larger centres.

The former has and undoubtedly will again be of some assistance in aiding unfortunate youths but the farm bonus plan, after all, is only a seasonal and very temporary measure. It takes care for a few months of the year of one class of the unemployed young men and only a percentage of the total. Moreover, it does not ordinarily train for or lead in the direction of permanent employment for the great majority of the beneficiaries.

The youth training project, too, has undoubted merits. The educational opportunity it affords is excellent and unquestionably those who attend these classes and pursue their studies with diligence, thereby better equip themselves to occupy a place in industry if and when the opportunity to do so appears, but unfortunately it does not, at present, lead to self-support, the natural ambition of every right-minded youth.

Abundant Opportunity

All that youth training does, as yet, is to increase the number who are equipped to compete for the few vacancies that occur in industrial life at a period when trade and commerce, using the term in its broadest sense, has not emerged from the doldrums.

Until such time as industry is able to more adequately provide for the needs and ambitions of the youth of the country it would appear that the only thing for the senior governments to do is to make some provision to enable youth to give vent to its energies in the natural and proper manner through work, and this can best and most profitably be done through the development of the vast natural resources in which the country abounds.

One could list a number of projects which might be undertaken, the prosecution of which would restore moral tone and physical vigor to disappointed youth and at the same time yield some return to the taxpayers who would have to foot the bill. It is hardly necessary to enumerate such development possibilities. One has only to look around and see the opportunities.

There is plenty of work of a beneficial nature to be done and there are plenty to do it. Why not connect the two?

Had Right Answer

"James," said the teacher, "come in front of the class and spell 'neighbor'!"—and he did so correctly.

"That's quite right, James!" said the teacher. "Now, Tommy, it's your turn. Please tell me what a 'neighbor' is."

"After a pause, 'Please, miss,' said Tommy, 'a neighbor is a woman who borrows things.'"

A bottle of water, standing outside a California house in 1931, focused the sun's rays with such intensity that the wooden wall was ignited.

HOW YOU CAN ATTRACT MEN

Don't let love and romance pass you by. Men like girls with lots of pep and energy.

So start taking Line-Process. Lydia E. Pinkham's Vegetable Compound and note the difference. Pinkham's Compound, made especially for women from wholesome herbs and roots, helps Nature cure your system and thus calms irritable nerves and gives you more pep to really enjoy life.

For over 60 years one woman has told another how to go "smiling thru" distress from female functional disorders with Pinkham's Compound. Let it help YOU!

Wrong All Around

"Wrong Way" Corrigan still casts his shadow.

A conductor on a Canadian National Railway train en route east in New Brunswick was making his rounds when he discovered that one passenger not only had a Canadian Pacific Railway ticket but was bound for Vancouver, B.C.—exactly in the opposite direction.

France Gets More Showers

France and other parts of western Europe receive less rain than the eastern United States, but, since the showers are lighter and more frequent, less water is lost by draining than in this country, where more sunny days and harder rains are more common.

During the gold rush in Alaska, beefsteak sold for \$48 a pound at Circle City.

Berlin has four thousand five hundred and fifty-three American residents.

Campaign For Conscription

Preparations In Britain To Be Ready In Event Of War

Sir Auckland Geddes, war-time minister of national service, appealed for re-establishment of a government office similar to the one he headed during the Great War, to ensure mobilization of the population for a total war within a few months after the outbreak of a new conflict.

In a letter to The Times, Sir Auckland suggested submission of a simple questionnaire to all British voters to determine their reaction to his proposal, which received the editorial support of The Times.

Viscount Rothermere's Daily Mail intensified its efforts to obtain replies from its readers to a questionnaire asking: "Are you in favor of obligatory military service or organization of a volunteer service?"

Lord Deaverbrook's Daily Express also continued its campaign for conscription of the nation's economic and man-power resources, citing the statement of Frank Fehr, president of the Battle exchange—one of the world's greater grain markets—in favor of conscription of men for the army and also for industrial and commercial enterprises.

Mr. Fehr said officials of the Battle exchange were disposed to see their entire organization placed at the disposition of the government.

Something New In Food

Ginger Bread With Buttermilk Said To Be Fine Combination

The columnist of the Baltimore Sun, writes one of his contemporaries, the other day remarked he had found what he called an unusual food combination recently—butter-milk and ginger bread.

"That is a food combination the origin of which would be hard to determine," says the columnist, "but I know it was a very popular combination constantly indulged in on the eastern shore of Maryland from time immemorial. The habit probably drifted down from Pennsylvania, for in every lower Pennsylvania home it is considered one of the best food combinations there ever was."

"Out in Carroll county no farmer's wife would think of offering you butter-milk without a slice of ginger bread with it—and if ever there was a combination that could charm away the torments of a hot day, it is a slice of butter-milk right cold out of the springhouse and a hunk of ginger bread made by the recipe that descended to Maryland housewives from the angels. Try it some time on a hot day after a long, tiring walk."

SELECTED RECIPES

MARMALADE BAYRIAN

1 package Orange Jell-O
3/4 cups hot water
1/2 teaspoon salt
1/2 cup heavy cream
1/2 cup orange marmalade
Dissolve Jell-O in hot water. Add salt. Chill until cold and syrupy. Fold in cream, whipped only until thick and shiny, but not stiff. Pour in marmalade. Chill until slightly thickened. Turn into mold. Chill until firm. Unmold. Garnish with whipped cream and additional orange marmalade. Serves six.

CANDIED COTTAGE ROLL

4 lbs. cottage roll
Boiling water
1 tablespoon mustard
Yeast
Sifted cracker crumbs
Whole cloves
1/2 to 3/4 cup Bee Hive Golden Corn Syrup
Simmer cottage roll in gently boiling water until tender. Cool in liquid in which it was cooked, then drain. Remove strings. Place cooked cottage roll on rack in roasting pan. Smooth mustard to a paste with vinegar, and spread over fat surface of roll. Cover with sifted cracker crumbs, accent in diamonds and center each diamond with a clove. Pour corn syrup carefully over the surface. Place in a hot oven, 400 degrees F., to re-heat meat and to glaze surface. Baste carefully once or twice during cooking with liquid in pan.

The English Translation

A Chinese landed in England for the first time. At Dover an official asked him his name.

"Sneeze," replied the Oriental.

The customs officer started hard at him.

"Is that your native name?" he asked.

"No," the Chinese shook his head.

"I had it translated into English."

"Then let's have your native name," persisted the officer.

"Ah Choo it is," replied the other.

Not What He Wanted

Bruce Anton, earning \$5,800 a year as chef in a London West End restaurant, was an ardent Nazi chief in London, but the last thing he really desired was to return to Germany. The other day he was recommended for deportation to his Fatherland.

Istanbul, Turkey, may ban names for streets and substitute numbers.

Dentists recommend Wrigley's Gum as an aid to strong, healthy teeth, cleanses them of food particles, massages the gums. Aids digestion, relieves stuffy feeling after meals. Helps keep you healthy! Take some home for the children too—they will love it!

Hermit Cell

Site Of Historic Cell Is Found In Westminster Abbey

The site of the cell of the famous "Hermit of Westminster," credited with an important role in the history of the early Tudor kings, was believed discovered in Westminster Abbey.

Lawrence E. Tanner, keeper of the Manuscripts and Library of the Abbey, disclosed that during spring cleaning he found a window and a door near the Poets' Corner of the Abbey.

The door had been blocked for an unknown number of years, but Tanner, after some excavation, clearing the dirt outside to a cell in which an elderly monk or holy man lived in retirement. No trace of the cell remains.

Tanner said Henry V, probably passed through the door the night of his father, Henry IV, died, March 20, 1413, and may have spent the night there with the hermit, who was given credit for reforming the young king.

(According to the Shakespearean story, Henry V was a wild young man before his accession, the companion of Falstaff and other disreputable characters. After his father's death he became one of England's ablest kings.)

Prison With A History

The Tombs On Manhattan Island Is Offered For Sale

Manhattan island's saddest spot—the place where criminals have been punished for 300 years—is for sale.

The city announced that the prison called The Tombs and the criminal courts building—both atrocious specimens of architecture—and the land on which they stand are for sale.

The price will be \$1,550,000.

The ground on which the buildings stand once was the jolliest place on the island. When Hendrick Hudson came in 1609 the spot was covered by a beautiful pond, fringed by mightily tall Dutch called the pond Kolch, meaning fresh water.

Like the Dutch, the English used the pond as a winter skating place. When the young Duke of Clarence, who later was to be King William IV, was a midshipman fighting George Washington's revolutionaries, he fell through the ice of that pond.

But the pond was more than happiness. On its shore the Dutch erected a gibbet. The English, too, used the spot for hanging Americans. In 1830, followed precedent by draining the pond and building a prison. Because of its Egyptian-style architecture, the public called it The Tombs.

Another Silk Substitute

New Textile Fibre Is Said To Be Actually Run-Proof

Japan is having trouble selling enough goods abroad to finance her imports of munitions for war and for necessities. Now her best applicant threatens to reduce her main export, which is silk.

From the laboratories of the main rayon manipulator in the United States there is news of the perfecting of a revolutionary textile fibre. It is declared to be entirely different from rayon to anything else now on the market, and is so strong and elastic that really run-proof stockings will presently be an actuality. Thus, the new fibre may replace real silk in its own great remaining market, hosiery.—Brandon Sun.

Payments To Pensioners

At the end of September a total of 95,037 cheques were being issued monthly to pensioners of the Great War. This represented a total annual expenditure of \$40,442,626. Manitoba \$4,495 pensioners receiving \$3,225,154.

Clerk: "May I have the afternoon off to go shopping with my wife?"

Boss: "No."

Clerk: "Thanks."

The whippet is said to be the fastest dog on legs. This dog can travel 200 yards in from 10 to 12 seconds.

The curvature of the earth amounts to seven inches per mile.

Outspeeds Howitzer Shell

Eyston Believes His Record Of Value To Car Designing

Captain George E. T. Eyston, who set the land record of 357.5 miles an hour in his seven-ton automobile, Thunderbolt, told some 200 members of the Downtown Athletic Club in New York about travelling faster than the shell of a field howitzer.

Introduced by Captain E. V. Rickenbacker, chairman of the contest board of the American Automobile Association, which timed Captain Eyston's runs on the Bonneville Salt Flats in Utah, and president of Eastern Air Lines, the British speed driver said that he believed record-breaking in specialized machines was of great value to the advancement of general automobile design from the points of view both of safety and efficiency.

"Tires able to withstand six miles a minute," he said, "prove that tires can be built which will not blow out at ordinary road speeds. Finer steels and lighter, stronger alloys and the precise workmanship which go into the construction of such a machine as the Thunderbolt with its 4,000 horsepower inevitably mean advances for the motor car intended for the average driver."

After describing how his machine was started by being pushed by a truck just to get the huge engines turning over, and how the change was made from second gear to top gear at a little over 200 miles an hour, Captain Eyston said that when the machine attained its top velocity the eight 48-inch wheels were revolving forty-five times a second. Speed reached, he added, 560 feet a second, compares with 700 feet a second for the bullet of a .45 calibre revolver and 400 feet for a howitzer shell.

"During the runs," he said, "the Thunderbolt gives off a streamer of black smoke about three and a half miles long. It passes the timing observers, with their electric eyes, simply as a 'whish.' Sound of its passing follows about half a mile behind."

Something Really New

Paper Pillow Cases Protect SLEEPER Allergic To Feathers

Here's another way for keeping down washing. The New York Herald-Tribune tells of something new in houses; the housewife's dream come true, in short:

"Did you know that you can have pillow cases for as little as 10 cents apiece, if you'll use paper ones? They are as soft as face tissues but heavier and stronger. We have actually slept on the same one for a full week. These paper pillow cases really came to light as a protection for those unfortunate allergic to feathers. No odor or dust particles from the pillow itself can penetrate through them. But many a person not allergic to feathers will welcome them for nights when an extra layer of face cream or an extra layer of treatment warrants special pillow protection."

Old Castle Wall Found

The foundations of a wall believed to be 600 years old were discovered by workmen digging a trench to lay pipe to the guardroom of Windsor Castle. It is more than five feet thick, the brickwork is in excellent preservation, and it was drilled through with difficulty.

How Kangaroo Was Named

The kangaroo was named through a misunderstanding. In 1770, Captain Cook asked a native the name of the animal and the native replied "kan ga roo," meaning "I don't understand." Cook thought it was the name of the animal.

There are 3,300 species of fish in the waters of North America.

I sweeten my morning cereal with BEE HIVE Syrup because it is better for me.

TRY IT TOMORROW

Oil On Ocean Bed

Canadian Coal Seekers Have Found Petroleum 2,300 Feet Down

What is believed to be the first submarine oil bed in the world has been found at Inverness, Nova Scotia.

A diamond core seeking new coal seams in a government-operated colliery came across flowing oil a mile from the mainland and 2,300 feet vertically below the sea surface. The crew had penetrated 233 feet horizontally in coarse sandstone formation when they found dripples of oil and water.

Confirming the find, Dr. Alan Cameron, provincial deputy minister of mines, said:

"We're going to carry the drill hole on further. According to the geologist and engineer there are definite showings of oil. If it is petroleum, it will be hard to get it."

Baby Panda Likes Frost

Pet At Chicago Zoo Does Tricks Only On Cool Days

Mei-mei, the Chinese baby panda, was a disappointment to Brookfield Zoo authorities in Chicago because she would not play up to her public like her predecessor, the late Su-lin.

Then came the season's first really cool day, so cool in fact that many persons huggled fireplaces instead of going to the zoo—and Mei-mei showed her first interest in playing and people. Mei-mei frisked and rolled, climbed and wiggled her nose at the few overcast spectators, while nearby baby gorillas went into a huddle and shivered.

Assistant Director Robert Bean is trying to figure out how to get Mei-mei and the public on an equal interest basis.

A Freak Potato

Ohio Woman Has One Displaying Human And Animal Faces

A freak potato, weighing two pounds and consisting of three branches, was found by Mrs. Marie Davis of Toledo, Ohio, in a bushel of potatoes she received from her sister's farm.

One of the potato's branches resembles an old woman with a bunch of hair knotted on the back of her head, and, turned at another angle, shows the likeness of a human face. Another branch looks like a rhinoceros' head and a third branch like a human face looking down.

England's first coffee house was opened in St. Michel's Alley, London, 1652.

It is possible to see an eclipsed moon while the sun is visible.

Heavy Damage To British Gunboat By Japanese Bomb

Shanghai.—British naval authorities announced six heavy Japanese bombing planes bombed the British gunboat Sandpiper at Changsha, causing considerable damage to the superstructure of the ship. No casualties were reported.

The British naval officers declared information received here made it doubtful if the bombing was accidental.

The bombing followed by a few hours a Japanese warning to foreign vessels to withdraw from the Hankow area. The warning forecast a mass bombing of the Yangtze river beyond anything yet attempted there.

Despite the warning, four British gunboats and two United States gunboats remained at their anchorage near Hankow.

The warning made no mention of Changsha, nearly 200 miles inland from Hankow in a south-westerly direction. Changsha is located on the Siang river.

The Chinese press also declared Japanese planes bombed the steamship Kiangshin near Yochow as it was sailing up the Yangtze river from Hankow with a crowded load of refugees aboard.

There were 1,000 casualties, Chinese reported.

(Hankow reports said Japanese were heavily bombing railroad terminals on both banks of the river at Hankow and were driving and strafing the streams of refugees crowding the roads leading west from the city. Large fires were started in the railroad yards at Wuchang, one of the tri-cities.)

Canton. The principal business sections of Canton were wiped out by fire but a sudden shift in the wind saved Shamen, international settlement of the Japanese-occupied city.

Flames still swept unchecked through downtown Canton. British, United States and French authorities sent aboard naval landing parties on Shamen island, just opposite central Canton, to help foreign civilians protect their colony.

All able-bodied men had been called out to wet down houses and roofs in the path of the fires approaching the district.

The landing parties helped round up looters who, in many cases, set fire to stores after ransacking them. Many foreign women and children found temporary refuge aboard the riverboat Tianshan, anchored between British gunboats.

Men residents of the international area joined Japanese troops in battling the fire after a northwest wind veered and ended the momentary danger of the flames leaping the narrow river between the island and the mainland.

The flames, fed by frequent explosions and apparently set by Chinese, burned in dozens of districts. A square mile of buildings in the downtown area was destroyed, including the post office and customs house.

Urge United Front To Help Marketing Of Western Products

Winnipeg.—Amalgamation of the United Grain Growers and the Manitoba Pool Elevators, Limited, and eventually the Saskatchewan and Alberta Pool Elevators into a united co-operative front to assist western Canadian agriculture was urged by Premier John Bracken of Manitoba.

"Co-operation among farmers and farm organizations offers more hope for the marketing of our products than any other method," the premier told 250 persons gathered at the Manitoba Pool Elevators' annual banquet here.

Mr. Bracken, who has called an international conference on marketing of western agriculture to be held in Winnipeg in December, said Canada's biggest and most difficult problem in years is the marketing of Canada's surplus products. It is not a problem of only western Canada but of all Canada, he said.

By the "marriage" of the United Grain Growers and the western wheat pools, Mr. Bracken said the three grain provinces would have a united farmers' voice to deal with their problems, and with it a united approach in discussing difficulties with the federal government.

He pointed out that due to supply and demand, world wheat prices were down. Canadian wheat was selling

directly opposite Shamen and large Chinese-owned hotels, department stores and restaurants.

Panic-stricken Chinese servants fled from the homes of employers and engaged in a sit-down strike among concessions in the main street, near the Victoria hotel, which was badly damaged by explosions.

Air Training Command

To Establish Canadian Headquarters At Toronto

Ottawa. Establishment of an air training command for Canada, with headquarters at Toronto, was announced officially by Hon. Ian MacKenzie, minister of defence. At the same time the minister confirmed that, following the set-up on the Pacific coast, an eastern command had been created for the Royal Canadian Air Force, with headquarters at Halifax.

The function of the air training command will be to direct and co-ordinate aviation instruction in the R.C.A.F. The main training station at Trenton will eventually come under the jurisdiction of the officer in charge of air training, Air Commodore Earl Godfrey.

Chiefly, it was explained, the object is to remove from the headquarters staff here the details connected with the actual day-to-day training of pilots.

The eastern command, under Wing Commander G. R. Brooks, will be "operational" and although aspects of training will be supervised within the eastern area by the commanding officer, this, in the main, will be directed from Toronto.

Annual Spring Shows

Dates For Western Canada Have Been Announced By Secretary

Saskatoon. Dates of the annual spring shows for western Canada have been announced by Sid W. Johns, secretary of the Western Canada Association of Exhibitions. The dates follow:

Brandon, week of March 13; Saskatoon, week of March 20; Regina, week of March 27; Calgary, week of April 3, and Edmonton, week of April 10.

First Line Of Defence

Says Newfoundland Is Bulwark Against Air Raids

Toronto. Canada's first line of defence against air invasion in Newfoundland, Sir Alfred Morine, K.C., former minister of justice in Newfoundland, told the young men's section of the Toronto Board of Trade.

Should a foreign navy capture Newfoundland, it would be provided with an air base from which to send raids against cities along the St. Lawrence River, Sir Alfred said.

To Establish Peace

Says Democratic And Dictator Countries Should Bury Differences

London. Joseph Kennedy, United States ambassador to Great Britain, declared that democratic and dictatorial countries should bury their differences and seek to re-establish good relations in a world threatened with disaster from a mad armament race.

Speaking at the annual Trafalgar Day dinner of the Navy League, Mr. Kennedy praised Prime Minister Chamberlain's "all but superhuman efforts in behalf of peace" in the recent crisis. He said, however, that "only history will show whether or not he made the right decision."

In the light of that crisis, Mr. Kennedy said, "it is hard to quarrel with the decision of any nation to build up its military forces; in fact we can only commend such action on the part of those sincerely committed to a policy of peace."

But he expressed the belief that the armaments burden was approaching the point "where it threatens sooner or later to engulf us all in a major disaster," and "for this reason the American people look forward to the day when the nations of the world will realize they must agree upon limitation and reduction of armaments."

The ambassador declared it had long been his theory that it was "unproductive for both democratic and dictator countries to widen the division now existing between them by emphasizing their differences, which are self-apparent."

"Instead of hammering away at what are regarded as irreconcilable, they would advantageously bend their energies toward solving their common problems and attempt to re-establish good relations on a world basis."

Would Halt Arms Race

Report That Prime Minister Chamberlain May Consult With Hitler

London.—Havas News Agency said it was reported in government circles that before Prime Minister Chamberlain throws Great Britain's armaments machinery into high gear he will make a personal appeal to Chancellor Hitler for an arms limitation agreement.

In this connection, Havas noted, Sir Neville Henderson, British ambassador to Germany, left Berlin for London to spend about a week here. The news agency added that Mr. Chamberlain takes the initiative toward limitation talks with Hitler, his plea will probably concern land as well as air armaments; past experience has indicated only qualitative limitation of land armaments can be hoped for.

It is taken for granted in London, said Havas, that France and United States would support any move toward a halt in the arms race. United States Ambassador Joseph P. Kennedy, in an address to the Navy League, spoke in favor of limitation.

Peace In Palestine

British Troops To Keep Rebel Outbreaks Under Control

Jerusalem.—Reinforced British troops are preparing for a southwest march to sweep the countryside of marauding Arab rebels while this pacified city looks forward to a new era of peace under civil government.

Reports persist here that Jewish immigration to Palestine would be greatly curtailed or even stopped under a new approach by the United Kingdom government to the question of establishing peace between Jewish settlers and militant Arabs.

There was a belief in responsible but unofficial quarters that Great Britain definitely had scrapped proposals to divide the Holy Land and would continue for some years at least to keep general control in the absence of a final solution to the 23-year-old problem.

ASSIS DUCES LENIENCY

Italy's decrees against Jews might have serious repercussions in the United States, Supreme Court Justice Salvatore A. Cotillo (above) of New York cabled Premier Mussolini, requesting an audience before the decrees go into effect. Cotillo, son of Italian immigrants, is the Commander of the Crown of Italy.

Trade Pact Delayed

U.S. Government Insists On Greater Concessions From Britain

Washington.—The United States government has given Great Britain notice that substantial concessions on certain American products are necessary for negotiations for the Anglo-American trade treaty must collapse.

The state department was said to be insisting upon a substantial rather than a superficial agreement. This attitude has been reflected, it was reported, in a communication sent to the British government, summarizing concessions Great Britain has offered thus far and declaring they did not warrant the United States government signing the proposed pact.

This was the first public intimation in Washington the treaty, between United States and the United Kingdom, Newfoundland and certain of the colonies, might not materialize. Negotiations looking to this important pact have been carried on simultaneously with the drawing up of a new reciprocal trade treaty between the United States and Canada.

Negotiations for the Anglo-American agreement, which would cap State Secretary Hull's general program of bargaining down barriers to world trade, have been under way six months. Experts on both sides have predicted trade between the two countries would boom once an agreement on mutual tariff concessions was worked out.

Shows Profit

Manitoba Pool Elevators Have Good Surplus

Winnipeg.—Net surplus of \$728,000 for paying operating expenses for the last year was shown by the directors' report considered at the annual meeting of Manitoba Pool Elevators, Ltd. Liquid working capital of the company is in excess of \$800,000. To reduce principal and interest indebtedness \$56,000 was paid. Pool Elevators now own three terminals at the head of the lakes with total capacity of 4,525,000 bushels, the third one having been purchased at the beginning of the recent crop year.

During the past season the company operated 155 country elevators in Manitoba. Total receipts amounted to 18,035,921 bushels, slightly more than 27 per cent. of all deliveries in Manitoba.

Germany Would Like Trade Treaty With Britain And U. S.

Berlin.—German economists indicated that Germany would like to become a third party to the British-United States treaty now under negotiation in Washington.

One of Germany's highest economic authorities, without permitting his name to be used, expressed opinion the proposed Anglo-American treaty could more rapidly become a fact if Germany were let in on it.

According to this authority, the United Kingdom is unable fully to absorb raw materials from United States because of its agreements with Canada. Germany could take these American raw materials, such as cotton, and pay for them with industrial goods deliverable in England.

He mentioned chemicals as one specific German product which Great Britain could readily absorb. Some types of machinery were also mentioned.

This authority was not too optimistic over possibility of early elimination of trade barriers. So long as the international debt problem is not liquidated, it was his opinion Germany must stick rigidly to her controlled economy. The stability of German currency, he said, depended on strict control.

German barter relationships with the Balkan states have flourished, he added, because producers of Balkan raw materials have obtained a fixed and practically unvarying price year after year from Germany.

This has been possible, he explained, because Germany's exchange has not been affected by world currency fluctuations for the reason that currency was not dependent on gold but had labor power behind it.

Ottawa.—Trade experts here were doubtful whether the Canada-Germany trade agreement or the proposed Canada-United States treaty would be affected if Germany became a third partner to the British-United States treaty now being negotiated in Washington.

Prime Minister Mackenzie King

has always welcomed any effort for freer trade but before government officials make any definite comment, details of any German trade proposal will have to be known.

"The trade agreement and payments between Canada and Germany was negotiated by Trade Minister W. D. Euler and signed Oct. 22, 1936. The agreement was to remain in force until Nov. 14, 1937, or thereafter until either of the two governments shall have given two months' notice of termination." No notice of termination has been given and the treaty is still in force.

Receives Decoration

Col. Charles Lindbergh Presented With Order Of German Eagle

Berlin.—Col. Charles A. Lindbergh received one of Germany's highest decorations—the Order of the German Eagle—in an unceremonious presentation Tuesday by Field Marshal Hermann Goering.

The decoration came at a reception Hugh Wilson, United States ambassador, gave in honor of Lindbergh had done for aviation.

As Goering passed down the receiving line he paused when he came to Lindbergh, telling him he had orders from Reichsfuehrer Hitler to give him the decoration as a token of Germany's esteem of what Lindbergh had done for aviation.

The American aviator replied with a simple "thank you" and hung the decoration around his neck without any of the usual ceremonies attending bestowal of the honor.

Federal Aid For Fire Sufferers

Ottawa.—Federal grants of \$25,000 to the Canadian Red Cross to aid the fire sufferers in the Port Frances district of northwestern Ontario and of \$16,000 to the municipality of St. Luc de Matane, Quebec, recently damaged by fire, were announced by Hon. Ernest Lapointe, acting prime minister.

To Promote Friendly Relations Between England and Germany

Clacton-on-Sea, England.—Sir Samuel Hoare appealed for Anglo-German co-operation to "fill up the trenches which have been dividing Europe."

At the same time he gave the government's pledge Great Britain would speed its rearmament and turn the United Kingdom into a fortress against air attack.

The home secretary, addressing a National government meeting here, defended Britain's preparations for war as based not on a distrust of Chancellor Hitler's "peaceful aspirations," but by the fear that successor to Hitler may not hold the chancellor's views on the need for armaments by Britain and the reich.

"Without friendly relations between England and Germany," the home secretary declared, "there can be no stable peace in the world."

The cabinet minister disclosed plans would soon be announced to make the civilian "home front as ready for action as any fighting service."

A vast campaign, he promised, would be set into motion to perfect anti-aircraft equipment, build up the air force, assure effective distribution of gas masks and create a system of trench refuges to make Britain im-

pregnable against a "knockout blow" from the air.

This tremendous national effort, the home secretary added, would be "founded upon British character, British corporate organization and British institutions, including the British preference for voluntary service."

Sir Samuel came vigorously to the defence of the Munich declaration signed by Hitler and Prime Minister Chamberlain which cast out war as a means of settling Anglo-German differences.

"Our critics declare that these are idle words and that you cannot believe the pledges of the German Fuehrer," the home secretary said after reading the text of the peace declaration.

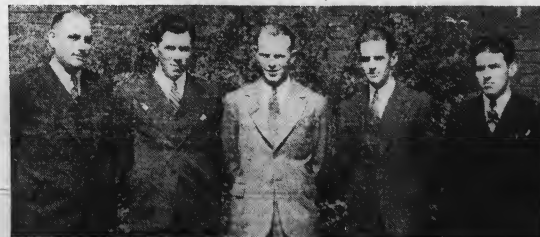

"I refuse to accept this view. I believe Herr Hitler, having met our prime minister and having freely discussed with him, man to man, the questions which may divide our two countries, means what he says."

"I know that those who do not take my view point to occasions when, having disclaimed the use of force, he (Hitler) has yet had recourse to it. I admit these instances inevitably give cause for anxiety. None the less, I am convinced that friendly relations with England have always been a cardinal point in Herr Hitler's policy. And I am also convinced that without friendly relations between England and Germany there can be no stable peace in the world."

Sir Samuel recalled that he, on behalf of the British government, signed the Anglo-German naval agreement which Hitler had kept in its letter and in its spirit.

"Here indeed is a concrete fact that entitles me to attach the greatest importance to the declaration made by Herr Hitler and Mr. Chamberlain," Sir Samuel declared. "Here indeed is a concrete fact that convinces me that with patience, restraint and readiness to understand our respective points of view, it is possible to fill up the trenches that have been dividing Europe into hostile camps and once again create a country of nations upon which a stable peace can be restored to suffering humanity."

FIRST HONORS TO CANADA

The team from Ontario Agricultural College, Guelph, which won first place in a field of twenty-six in the Collegiate Dairy Cattle judging contest at the National Dairy Show held at Columbus, Ohio. The team made a score of 5,371.6 points out of a possible 6,000 in the judging of all breeds of cattle. Three weeks earlier, at the Eastern States Exposition at Springfield, Mass., the same team won the major honors from eleven United States colleges. Right to left: Prof. G. E. Rathbun of the O.A.C.; E. S. Beer, F. J. Archibald, G. R. Bagg and L. T. Sorley.

Current Comment on Local Events

THE WRITER breathed a sigh of relief. Believing that it is up to every worth-while citizen to assume some civic responsibility, he has for five years acted as secretary and manager of the Community hall. It is a job for which you receive no thanks and all the grief associated with jobs of this nature. However, five years of it is a fairly good turn, and now there is a fine chance for younger people to blossom forth and carry on the work of financing and operating the place. They should jump at the opportunity—that is if they wish to retain the use of the community hall for their activities.

THE NEED for the town providing a hall for various activities is emphasized very forcibly. The town band wants a place in which to practice. The youth training classes need a hall. Naturally they want it without cost. The band gives its services. It deserves encouragement. If the youth training classes (which by the way includes some quite old youths) is beneficial from a community standpoint, then it deserves encouragement too. But someone has to pay the cost of accommodation, and it would seem that this is a town responsibility if these things are to be encouraged. Of course, even a town must receive revenue from hall rentals, or the taxpayers must pay through grants to enable a hall to operate. But the fact remains that a town of 4,000 people needs a community centre under municipal control and it should be financed by the municipality. It should be given serious consideration by the council. Appropriation has been made for a skating rink, thereby setting a precedent for a community hall.

MUNICIPAL COUNCILS are really the backbone of democratic government. Members of provincial legislatures, of the House of Commons, are paid for their attendance at sessions, and receive free railway passes on the railroads. Urban and rural councillors give their time for the good of their communities. The reward usually is plenty of criticism and no expressions of appreciation. Not that any mayor or councillor should feel that this is the only place where such lack of appreciation for good work is shown. It has been so all through the ages. But it is disheartening at times when one reflects that certain men have given liberally of their time and talents to have nothing but ingratitude flung at them by hyper-critical fellow citizens.

St. Paul's Church Choir Organized

The second practice of the United choir was held on Wednesday evening and organization completed.

The following officers were appointed: Mr. Joe Emmerson, president; Ray Spillers, secretary; Mrs. A. Walker, Miss Isa Ramsay, Reuben Johnson, J. Cousins, social committee; Miss Umie Johnson, librarian. It was decided by the executive that the minimum age limit be set at 15 years. Arrangements will be made this week for the organization of a junior choir to assist at the morning services. The senior choir will have charges of the Sunday evening services from now on.

Detailed Report of Board of Trade

(Continued from Page 1) Intendant of the Lake Superior division. I remember well his receiving a telegram giving some detail of the slide, and how he and the late Gus Erickson were trying to figure out what had happened. I did not, however, make a trip through this portion of Canada until some years later.

I am fully cognizant of the fact that the communities which you represent are entirely dependent on the amount of coal which can be sold, and, therefore, I did not, however, make a trip through this portion of Canada until some years later.

I take it you are fairly familiar with the reasons for the loss of considerable commercial market, making the coal industry in this area more dependent than ever upon the needs of the Canadian Pacific Railway. While we have not been able to take up the slack resulting from the loss of those commercial markets, we have made, in my opinion, a real effort to help you.

When I tell you that in 1923, the mines from this general area supplied only 67.2 per cent of our Western Lines' needs, but during the year 1957 supplied 93.2 per cent, I am sure you will agree that we have not been neglectful of the southern Alberta, Canadian and southeastern British Columbia mines.

The competition so far as your commercial markets are concerned, is continually becoming keener, by reason of the development of the big companies, which coal, as you know, is being more extensively used in power plants. So far as locomotive use is concerned, your competition, of course, is with American coal largely, and the figure which I quoted a moment ago indicates the extent of which your coal has displaced that of the amount of American coal still burned by us is now a minor factor so far as you are concerned.

The remarkable development of the crude oil fields in Alberta no doubt gives bituminous coal operators cause for concern as to the ultimate possible effect upon their operations. It seems to me that these executives as a group would be well advised to consider seriously that potential contingency, and through research or other means, make possible the production of coal at a cost which will remove competition from that and other sources, or at any rate, push it further into the future. If you are to improve your position in this respect, it is evident co-operation between yourselves as well as between the operators and employees is essential.

Inasmuch as this meeting is under the auspices of the Board of Trade of this part of the Province, it is my intention to devote the balance of my time to a discussion of the Board of Trade activities, in the hope that I may say something which will stimulate in the business men of these communities increased interest in the Board of Trade work.

I imagine the idea of Boards of Trade originated in communities of considerable size, largely for the purpose of the development of the business life of those communities. To a great extent the Boards of Trade in the cities devote the bulk of their time and effort to that purpose and looking after the interests generally of business, insofar as it may be affected by municipal, provincial and dominion legislation.

The Board of Trade idea gradually spread until today most communities in which there are any progressive business men or other citizens contain such an organization. In view,

however, of the difference in the local situations, diversity of organization and objectives has been found desirable. Appreciating the value of Boards of Trade in even the smaller towns, it is proposed to outline to you some of the activities which you might carry on in the interest of the community which you represent.

In addressing a number of Boards of Trade in smaller communities in Manitoba during the past year, I discussed this subject, and in my introductory remarks asked the question "What is a Board of Trade?" you order that I might in a few words give my answer to the question. It was:

"A Board of Trade is an organization composed of business men and professional men, and others who are interested in the improvement and development of the community in which they live, and who are prepared to give of their time and some of their means in order to assist in carrying out the objectives of the Board, which objectives will vary according to the location and general needs of the community the Board serves."

My active contact with a Board of Trade has been with that of Winnipeg. I thought it might be of interest to you if I gave you a brief outline of the different activities carried on by that Board. The work of the Board is carried on under the direction of a Council, which is composed of the chairman of the different committees or bureaus, and certain members elected from the membership at large, the executive committee looking after the details of the business reporting to the council. The general activities of the Board are carried on by the committees and bureaus, making their recommendations to the council. Some of the principal bureaus are known as:

CIVICS BUREAU—which is charged with the responsibility of studying municipal affairs as they may have a bearing upon taxation, or in connection with such subjects as interests, as well as the general welfare of the community. The Board, of course, does not directly, through this bureau, take any part in municipal or other policies;

FINANCIAL BUREAU—which deals largely with legislation relating to financial matters, such as taxation, governmental finances, etc. You, as business men, have undoubtedly been affected in recent years by legislation having to do with such matters. The financial bureau studies any legislation which is introduced along this line which may have a detrimental effect upon their interests;

DONATIONS BUREAU—Business firms in the large cities are, by some organizations, considered easy prey, and are continually bothered by solicitations for donations of one kind or another. Many of these are for purposes in which the firm is not interested, and in most cases are for objects which should be looked after by those making the canvass. The donations bureau was organized in self-defence and is working out very satisfactorily;

SAFETY BUREAU—We do not confine ourselves to activities which are of direct benefit to our members, but extend such work to the benefit of the general welfare. The safety bureau is one outlet for this activity. It is composed of men who are interested in making our highways, beaches, etc., free from hazardous practices and conditions.

AGRICULTURAL BUREAU—We have in our membership men who are vitally interested in the development of agriculture from the standpoint of its relation to their own business and of their appreciation of the value of a prosperous agricultural community adjacent to the city.

GENERAL LEGISLATION COMMITTEE—From time to time there is introduced in the city council or legislature, legislation which upon close study will be found to react unfavorably upon business, and frequently upon the citizens generally.

There are a number of other committees to which reference might be made, but I think this is sufficient to give you an idea of how a city board of trade functions.

Place of a Board of Trade in a Community — Supplements Municipal Council. At first thought, one might feel that in communities such as are represented here tonight a Board of Trade would have no place, it being claimed that the municipal council is able to take care of all the matters requiring attention. I submit to you, however, that a person taking that attitude is distinctly shortsighted and unwise in his interpretation. The duties of a municipal council are a business and administrative nature. They are responsible for the physical needs of the town, such as the maintenance of streets, sidewalks, lighting, water facilities, sanitary arrangements, preservation of order, education, etc., and believe me, gentlemen, if those elected to municipal and city council will do more intelligently what time they can spare from their businesses to the carrying out of these municipal responsibilities, they will have plenty to do in effectively attending to those matters which I have mentioned.

There are other matters which do not come within the strict responsibility of a municipal or city council which a Board of Trade is better fitted to deal with. For instance, the development of a spirit of pride and confidence in the community. The Board of Trade is in a much better position to create enthusiasm and confidence in its community than is the council, which is so busy with details of administration.

Is there anything more helpful to a town or city than to have everyone boasting for and full of pride in the place in which they live? What inducement would there be for some of our people to leave the place for which the citizens displayed no respect or confidence? The Board of Trade by the nature of its organization is qualified to foster the spirit which will create the atmosphere of pride and confidence.

The Board of Trade can, because it is unofficial, be effective in making its community known, with a view to attracting tourist traffic its way. The outlet for the energy and activity of a Board of Trade in a smaller community may be quite different to that in the City of Winnipeg. Possibly playgrounds or a skating rink for the children are required, provision of which is not the responsibility of your council; a Board of Trade could initiate such a venture. By cultivating closer relationships with the agricultural community, you can attract business to your town which might otherwise go elsewhere.

There is no limit to the good which a Board of Trade may do in its community. It depends on the initiative and the proper organization of its members for service. If you are to make the most use of the many responsibilities, you should be organized into committees having responsibilities for specific objectives.

From what I have said I hope you will feel in agreement with me that there is a place for a Board of Trade in the communities in which you are living.

There are a number of other committees to which reference might be made, but I think this is sufficient to give you an idea of how a city board of trade functions.

VALUE OF A BOARD OF TRADE

I have still a few observations I would like to make as to the value of a Board of Trade to a community. The place and value of a Board of Trade in and to a community perhaps have not been given the consideration that a clear distinction between the two may not be evident, but there are some phases of the work which, in my opinion, set a value upon it apart from my references to place of the Board in the community.

Publicity—An aggressive Board of Trade whose activities are guided by good judgment and common sense can be of considerable value to a community through the dissemination of publicity matter. I well remember, a good many years ago, when the city of Lebrun was considerably smaller than it is today, the very wide publicity which was given to the Board of Trade, and still growing city through its Board of Trade, had no doubt that publicity had a great deal to do with the number of people attracted to that community and district.

Co-operation between the Board of Trade and the local newspaper is of considerable value. Some of the papers published in the various towns reach the large city daily newspapers throughout the country and very frequently items of interest are copied in those daily papers. The weekly newspapers exert a very wide influence, much greater than many people realize. Therefore, I say a town newspaper and the town Board of Trade co-operating in this way, are of considerable value to a community. From a publicity standpoint, an active and aggressive Board of Trade is of great value to its community.

Membership in Board of Trade Stimulant—Membership in a Board of Trade stimulates pride in the community. Membership in a live Board of Trade should, therefore, stimulate its members to a high standard of business ethics and efficiency which will inevitably reflect itself in the administration of municipal and civic affairs.

Unselfish Service—The work of the Board of Trade members being largely of an unselfish nature develops more enthusiasm and pride in the community for which one is paid. The rendering of such service cannot help but result in the development of the community. It inevitably follows, then, that service which primarily is rendered from an unselfish standpoint is rewarded through the increased business coming from the development of the community.

It has been my observation, over a period of years, that where there is a live, active Board of Trade, you will find a progressive community. Their words, show me a good Board of Trade and you will show me a good town.

Opportunity for Provincial and Dominion-Wide Co-operation; Canadian Chamber of Commerce Meetings at Vancouver; Seignior Club. It was my privilege to attend the last two annual meetings of the Canadian Chamber of Commerce, held at Vancouver, and at the Seignior Club, Quebec, when a large number of outstanding business men throughout Canada attended. These men represent the interests of the community, but it was very pleasing to find in the discussions that they were prepared to sacrifice their own particular interests where it was found that the welfare of the country as a whole necessitated doing so. This Canada of ours is a great country with tremendous possibilities. It can be developed properly only through co-operation, and in this development the Boards of Trade and Chambers of Commerce throughout the land have a great opportunity, in fact, responsibility, to assist in that development.

While we must consider our own community as the first bound to profit ultimately by an all-around and sound development of the various matters, let us view them both from our community and provincial and Dominion standpoint, and reach our decision accordingly.

Blairmore's Public Library is Boon to Readers

Has Over 3,500 Books Secured by Voluntary Effort, High School Girls Assist Mrs. Larbalestier. A splendid example of voluntary work is seen in the carrying on of Blairmore public library, under the chairmanship of Mr. Donald McPherson, principal of the schools, and Mrs. C. M. Larbalestier as secretary. The library is accommodated in a building on the north side of the track, and is opened at regular times during the week, ten high school girls taking turns as registration clerks.

The books include fiction, travel, biography, history and other subjects. So much interest is taken in the work that quite young school students help, young Douglas Wilson being one of the library board, and he is very enthusiastic and efficient.

The fee to Blairmore people is \$1.00 per year, and to people in other Pass towns \$2.00, which is a trifling sum compared to the benefits available. Mrs. Larbalestier cordially invites the people of Coleman who might be in-

terested to visit the library and to become members.

Monkman Pass Highway Special Edition

The Journal acknowledges through the courtesy of Mrs. Harry Gardner a copy of the Monkman Pass Highway Edition of The Northern Tribune, published at Grande Prairie, Alberta. The photo of Alex. Monkman, to whose energy and enterprise is due most of the credit for initiating this enterprise of building a highway to the coast from the Peace River block, adorns the front page, and many interesting stories and photographs review the progress of the work. Great credit is due to the people who despite lack of government interest in the scheme, have gone ahead with the determination to build the highway with voluntary labor.

Born, to Mr. and Mrs. Nick Nicholas, on Saturday, Oct. 22, a daughter.

The Churches

ST. ALBAN'S CHURCH
Rev. J. R. Hague, Incumbent.
10 a.m., Sunday school.
7 p.m., Evensong and sermon.
Read St. Matthew 23:23-28.

You cannot purify the water by painting the pump. John Blank went on occasional sprees. In the course of a year, these orgies brought him to the hospital three different times—once for a bad cut in his head; next a broken leg, and the third time because of wood-alcohol poisoning. Each time, the care at the hospital restored his health and he was sent home. How much better and cheaper it would have been if he had been helped to free himself from drink.

Let us get at the root of the difficulties in our community. Let us not be content merely to run the ambulance to the foot of the precipice and pick up the pieces, necessary as that may be. Rather, let us build a strong fence at the top of the cliff. The late Bishop Williams, of Michigan, once remarked in a sermon on the gospel story of the Good Samaritan, "It is all right to bind up his wounds, but who will be brave enough to go out and clear the thieves off the Jericho road?"

To give people right goals and motives is the work of the church. As you increase the strength and effectiveness of the church in this work, so you will help your community.

You are cordially welcome at St. Alban's church. Your fellowship and co-operation are earnestly solicited.

THE UNITED CHURCH

The church was well filled on Sunday morning, when the choir of 20 members, under Dr. C. Rose, led the singing and sang a selection. Rev. C. Burkholder gave a much appreciated address in the interests of religious education. He pointed out the importance of the child as being the one in whom all the seeds of future good and ill are planted. Mr. Burkholder is the newly appointed leader for religious education in Alberta and British Columbia. He is assured of a real welcome whenever he returns to the Pass. He addressed a largely attended rally of United church young people at Blairmore on Friday evening. Coleman was well represented.

The Sunday school also showed signs of returning vigor, as the highest attendance since the holidays was registered and a new class was started. This is a girls' class, for which a teacher is required. The evening service was much better attended than has been the case for some time, and this means a great deal to all.

Several additional people have agreed to become members of the choir, which will lead the singing at the morning service. The services on Sunday will be as usual. There is room for many more children at the Sunday school. Mrs. Boyan has charge of the beginners' class.

CHURCH OF THE NAZARENE

11 a.m., Sunday school, with classes for all. Contest creating much enthusiasm, with Blues still ahead. Morning worship at 12 noon; subject of pastor: "Essential Accompaniments of Salvation," Hebrews 6:3. Evangelistic service at 7:30 p.m.; special singing. Weather permitting there will be a street meeting at 6:30 p.m. in front of Coleman hotel.

Tuesday, 7:30 p.m., Bible study; lesson on I. Chronicles.

Friday at 7:30 p.m., Prayer and praise meeting. The prayer meeting on Oct. 28 will be postponed, as the pastor and assistant will be at the convention in Calgary.

Beginning with Nov. 1 the services will be held in Knowles', next to Hunter's Bakery.

Frances Dibble will leave for Winnipeg on Sunday to enter the Children's Hospital for further treatment.

WORLD HAPPENINGS
BRIEFLY TOLD

The Smithsonian Institution announced invention of a new instrument which will measure the heat of a star billions of miles away.

More than half of the 4,000 United States volunteers who took up arms in the Spanish civil war apparently have been lost in action.

Red Cross officials estimated they would require \$50,000 for the work of rehabilitating families who lost their homes in fire, flood, etc., in the Port Frances, Ont., area.

The New Zealand government is sending to England 30 airmen for training, to return as pilots in the 30 Vickers aircraft recently purchased in England.

Members of the British Legion, ready to sail for Czechoslovakia to police the proposed plebiscites in mixed population areas, were advised their services would not be required.

A meteor, throwing off a stream of sparks and followed by a trail of flame, is reported to have fallen southwest of Coleman, Alberta, efforts to locate it were unsuccessful.

An extensive campaign against return of any part of Windhoek to Germany is planned by a "Southwest African League" now being formed there.

Lord Stanley, dominions secretary and heir to the Earl of Derby, who died recently at a London clinic, visited Canada and opened the Canadian National Exhibition at Toronto this year.

Recruits continue to enlist in the regular army in increased numbers despite the peaceful solution of the European crisis, the War Office announced. In a recent week 940 were enrolled, 528 more than in the corresponding week of 1937.

To Meet Emergencies

Proposal For British Test Mobilization To Be Held Annually

A plan for an annual test of mobilization of Britain's civilian population to meet any emergency of the future has been placed before the committee of Imperial defence by Calgary-born Brig-Gen. A. C. Critchley.

The scheme is based on precautionary measures evolved by the sports promoter 18 months ago and applied to his vast enterprises during the recent crisis.

At that time a large number of his employees were temporarily released for duties with the Territorials, the balloon barrage, and the air raids precautions organization, but pre-arranged programs were carried out without a hitch by the immediate introduction of a shadow plan.

General Critchley now proposed that the civilian population should similarly be organized and called up for a test drill next summer. He suggests a trial evacuation of congested areas, the manning of all branches of the defence services, and mobilization on the basis of a national register with a minimum of disturbance in industry.

Poultry For British Guiana

R.C. Poultry Breeders Supply Foundation Stock At Good Prices

So satisfactory has a shipment of record-of-performance poultry from Canada to British Guiana made last year proven to be that the Department of Agriculture of that country recently placed another order through the Dominion Department of Agriculture. This recent order is for eight white leghorn pullets and two and eight Rhode Island Red pullets and two males, all of record-of-performance breeding stock. The birds are now en route to British Guiana. The shipment was purchased from two British Columbia poultry breeders. The satisfactory price of \$15 each was paid for the pullets and \$25 each for the males, f.o.b. breeders' farms. These birds, like last year's shipment of Barred Plymouth Rocks, are to be used for foundation breeding stock in British Guiana, where poultry raising is becoming an increasingly important industry.

Near The Polar Sea

In the frozen areas of Grant Land, facing the Polar sea, scientists have discovered 75 kinds of plants, five species of butterflies, and two species of bumblebees. Grant Land has an average summer temperature of 34 degrees above zero and an average winter temperature of 36 degrees below.

A tooth is the only part of the body that cannot repair itself.

Some minds are so open that current events blow right through them.

Mercury must be present in an alloy before it can be called an amalgam.

For Healing Wounds

New Oxygen Treatment Is Shown American College Of Surgeons

Oxygen loosely locked up in grains of white powder was reported as a new treatment for healing wounds rapidly.

The process was shown to the American College of Surgeons at a clinic at Presbyterian Hospital by Dr. Frank L. Meleny.

Oxygen, it was explained, is supposed to owe its healing power in wounds to its ability to drive out the kind of bacteria which live without oxygen. They are known as "anaerobes" and include some of the serious sources of infections.

The obstacle to using oxygen has been its quick evaporation from the wound. The powder is a new product of chemistry, zinc peroxide.

It is dissolved in liquid and flushed through a tube. The heavy zinc particles spread through the injured tissues and lodge there. Each grain of the zinc thereupon becomes a local fountain of oxygen. It keeps on giving off oxygen for several hours.

Books as part of the cure after an operation were urged by Gordon R. Kamman, M.D., of the University of Minnesota.

The right books, he said, will help in recovery, and the wrong ones will make the patient worse.

"Too few people," he said, "are aware of the possibilities of reading in the treatment of medical, surgical and psychoneurotic patients. The individual must be regarded as a whole and we no longer cling to the obsolete concept of men in which the mind is considered separately from the body."

"To allow outsiders to supply patients with reading material unpurified is as bad as allowing them to bring the patient his diet or medicine."

The right books, Dr. Kamman described as those which take the patient's mind off himself. The "so-called tired business man," he said, is a tough subject for books because as a rule this man has been so busy making money he never has had time for reading and is not interested.

A Suggestion Made

A Little Discussion Over The Royal Visit To Toronto

Neither Toronto nor any other city is entitled to claim a prominent place in a three-week visit of the King and Queen to Canada. It goes without saying that Toronto people will be proud and delighted to have the royal visitors as guests for as long as it is convenient for them to stay, but when a communication to that effect has been forwarded to those in charge of the Canadian visit, that is as far as Toronto's importunities should go.

The suggestion which has emanated from the Board of Control that Mayor Day should write to Lord Tweedsmuir stressing Toronto's claim to a prominent place in the royal plans is the type of thing which has earned for this city the opprobrium scorned of Hogtown. Without any thought as to the national character of the visit, it is proposed that a letter in this sense should be forwarded to Ottawa "so that a lengthy visit to this city would definitely form part of Their Majesties' Canadian Itinerary."—Toronto Telegram.

Have Become Important

Skins Of Rats And Mice Are Of Value To Japan

Rats and mice are ordinarily thought of in Japan, as elsewhere, as vermin. But in the present period, when substitute materials are being sought on every side, they have been included in the general scheme of "commodity mobilization."

Their skins, it is asserted, can be tanned and used as material for knapsacks, brief cases, vests, lining of coats and other articles which are usually made out of more valuable materials.

The market for dead cats and dogs is rising for the same reason, the value of their skins.

The prices of the various animals are reported as follows: Five to seven yen (six to eight shillings) for a dog, one yen for a cat, ten sen for a rat, and five sen for a mouse.—London Observer.

Very Friendly

The British battle cruiser Hood and the German pocket battleship Deutschland exchanged friendly greetings recently as they left the harbor at Gibraltar. The Hood had played "Deutschland Ueber Alles" when leaving for Marseilles. The Deutschland, bound for Cadix, responded with "God Save the King."

Australia's first factory for making Axminster carpets is being built.

The Olympic Games were revived in Athens in 1906.

Modern Travel Speedy

In Three Hours, Car Accomplishes 18-Day Canoe Trip

Difference between modern travel and traffic a century ago was driven home to three boatmen at Winnipeg recently.

Harry Bushel, his 14-year-old son, Andy, and Murray Peden started out by canoe on the Assiniboine river from Brandon to paddle to Winnipeg. The 150-mile trip ordinarily is made in about three hours by automobile but it took the paddlers 18 days to complete the voyage.

They estimated the winding river route is 600 miles in length and their one desire near the journey's end was to beach the canoe, climb into civilized clothing and head for the nearest movie.

The trip was made in a 16-foot canoe and they carried 600 pounds of equipment. Actual time on the water was about seven hours a day for 13 days. The rest of the time was spent on stop-overs.

There were many rocks and rapids along the way, Bushel said, and the going was "tough" during the first four days. Nights were spent along the river bank in a tent. They started out about six o'clock each morning.

There were no spills, Bushel said, although once the rapids swirled the boat around and they shot down the river backwards.

GOOD NEWS FOR LARGER WOMEN

By Anne Adams

Turn your eyes towards winter and you'll discover many a need for this flattering frock—especially designed for the larger figure up to size 50. Don't you like the scalloped neckline? It lends such dainty distinction to an otherwise simple silhouette! The pockets and the ruffle edge are other chic details. As for the pants at front and back, they slenderize to an almost magical extent—because they flow the full length of the dress. Indeed, you can't find more becoming lines or greater comfort in any style! When you consider the making, remember that there's a Sewing Instructor to help you! Choose chamois, percales and the silks. Send for this pattern today. Pattern 4920 is available in women's sizes 36 to 50. Size 36 takes 4½ yards 36-inch fabric and 1½ yards ruffling.

Send twenty cents (20c) in coins (stamp cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

New Surgical Tools

Advances In Electricity Are A Great Aid To Surgery

New surgical tools which give their own light like fireflies or glow worms were exhibited to the American College of Surgeons.

One, called a depressor, could be substituted for the spoon which grandmothers used to hold down a child's tongue while looking for a sore throat.

A clear, glassy material, solid and of quarter of an inch thick, this new tool would glow all over with a green-yellow light. But its lower tip, down in the throat, would shine with a brilliant light to illuminate the entire throat.

These tools are made of a new synthetic material which is as clear as glass. But it has the peculiar property that light will follow its interior around a curve.

The Highest Good, Ecclesiastes 1:1-3, 10, 11; Romans 6:17-23; 14:21. Devotional reading: 1 Corinthians 6:9-11.

The surgeons were shown that this radio incision can be used to advantage in many special operations, in the brain, chest, eyes and glands. It was declared to be an easier method of sterilizing wounds.

U.S. Defences

Mass Production Of War Equipment Is Indicated

President Roosevelt said he was making an entirely new study of the United States' national defence needs and that until it was completed he could not estimate next year's budget.

The president told a press conference new technical developments in national defence measures required a complete study of defensive requirements.

He said the reason for the re-assessment of these needs began to take shape about a year ago because of information coming in in connection with world events. He said the question was forced to a head in the past month. In response to a question he said the new information was of a technical rather than a political nature.

One of the things being studied, he said, was that of mass production of war equipment, including airplanes, power and other items. He said the production question was something new and intimate one phase to be studied was standardization of "plane production, which some countries already have adopted."

Trains And Planes

For Many People Locomotive Will Never Lose Its Glamor

The other day, says B. H. in the Victoria Times, I kept abreast of a heavy grain train down the Fraser Canyon for miles and miles, so close that I could see the tobacco jug in the bowl of the engineer's pipe, and I found that I wished them, as intensely as when I was seven years old, that I was a locomotive engineer, with a giant steam under me. In time, I dare say, the airplane may acquire a glamor like that, but not for many years. We may use it, but we shall never love it as we love a train. An airplane is a new thing, an upstart. A train was our friend in boyhood, and the sound of its whistle will always remain in our hearts.

It is said that one of the reasons given by Louis XIV. for the building of the great palace at Versailles was that it would provide employment for 30,000 workmen over many years.

AUSTRALIAN HUMOR

"Now isn't that amazing? My horoscope said I'd meet a tall, dark man in strange circumstances."

—From The Sydney Bulletin.

SUNDAY SCHOOL LESSON

OCTOBER 30

PERSONAL RIGHTS AND WHERE THEY END

Golden text: What then? shall we sin because we are not under law, but under grace? God forbid. Romans 6:15.

Lesson: Ecclesiastes 2:1-3, 10, 11; Romans 6:17-23; 14:21.

Devotional reading: 1 Corinthians 6:9-11.

Explanations And Comments

The Quest of the Chief Good Through Enjoyment, Ecclesiastes 2:1-3. In the first chapter the writer has been discussing his quest for the highest good in the shape of wisdom. That quest proved unsatisfying, and he now turns to enjoyment as the source of the highest good.

The Yain Quest through Possessions, Ecclesiastes 2:7-11. The writer indulged in every desire of his heart, acquired as many as 1000 wives, precious metals, muskincense, and inmates of the harem, but, as before, all was vanity, a striving after wind, and there was no profit under the sun—none of the things could satisfy him. He withheld not my heart from any joy. The Expositor's Dictionary of Texts quotes these remarks of Paine on Alfred de Musset: "He desired too much, he desired too strongly, and greedily to taste life in one draught, thoroughly; he did not ignore or taste it, he tore it off like a bunch of grapes, pressing it, crushing it, twisting it, and he remained with stained hands, just as thirstily as before. Then broke forth robs which found an echo in all hearts."

The Highest Good, Romans 6:15-23. The "One-Volume Commentary" paraphrases this section as follows: "You are not under law, but under grace. You belong either to sin or to God; you cannot belong to both. Although you were the servants of sin once, you have now taken to Christian teaching as your rule of life, thus exchanging the service of sin for the service of Righteousness. The illustration is inadequate, for you are better than slaves, you are God's children. But I want you to see that you must now devote your bodies to righteousness and sanctification as unreservedly as once you devoted them to impurity and license. Poorly you served sin only, and the only reward you had to look for was eternal death. Now you serve God only, a service leading to sanctification, with everlasting life in prospect. Make no mistake. Those who serve sin receive the death they have deserved. But God gives to his servants what they could never earn, even everlasting life in union with Christ."

Abstinence for the Sake of Others, Romans 14:21. If anything that you do would cause a brother's fall, avoid it for his sake.

Heavy Investments

Large Sum Of United States Money Invested In Canada

United States investments in Canada amount to \$3,630,000,000—more than one-third of the total United States investments abroad and by far the largest of the total, according to a survey by the United States Chamber of Commerce.

The complete statistics for 1937 show that in addition to the Canadian investment, United States investors had placed \$2,562,000,000 in South America, \$237,000,000 in Europe and more than \$800,000,000 in the West Indies.

The survey also disclosed that expenditures of Canadian travellers in the United States account for two-thirds of the total travel outlays by foreigners in the United States, while United States travellers in Canada spend here half of the total travel outlay of the United States.

The Last Word

Newspaper Writer Slipped Something Over The Publisher

Christopher Morley, the American author, at one time conducted a column on the Philadelphia Public Ledger, then owned by the late Cyrus H. K. Curtis, also publisher of the Saturday Evening Post.

Curtis was piqued at something which Morley wrote and gave him his notice. In the last column he was to publish in the Ledger, Morley inserted an apparently meaningless line: Taming of the Shrew, Act IV, Scene I, Line 36.

Readers chuckled when they looked up the reference, for it read: "A cold world, Curtis, in every office but thin; and therefore fire!"—Winnipeg Tribune.

New Use For Silver

Silver-Coated Food Containers A Possibility Of The Future

Consumers some day may be able to buy their soup and succotash in silver instead of tin cans, if experiments revealed at the International Electrochemical Society meeting prove practical. Silver-coated food containers were just one of the possibilities suggested for the metal. Dr. Lawrence Addicks of Bel Air, Md., told the electrochemists that when the government stops supporting the market by buying more silver than it needs, scientists are going to have to take up the slack with industrial uses.

Industrial arbitration first was employed in the settlement of labor disputes before the French Revolution at Lyons, when controversies arose in the silk industry of France.

Beef and cabbage cooked together comprise the English dish of "bubble and squeak."

According to one London magistrate, "Boxing the ears is the most dangerous way of hitting anyone."

An excellent lubricant for squeaking doors and other parts of a car is a common wax crayon.

Health LEAGUE of CANADA

presents TOPICS of VITAL INTEREST

Engines Of War

Best Way To Combat Air Raids Is To Meet Invaders In The Air

A Great War veteran who has scrutinized the "terrible engines of war" finds them neither as fearsome nor as awe-inspiring as one might expect.

Col. E. J. C. Schmullin, director of engineering services, department of national defence, told members of the Engineering Institute of Canada at Toronto that in spite of advances in design and fire-power of modern military weapons, conditions in any future war would be no worse than those of 1914-18.

Each advance in weapons of offense, he said, has been offset by corresponding improvements in defensive armament.

Best defence against air raids, he declared, was to meet the invaders in the air before they reached their objective. A fleet of fast pursuit ships could cope successfully with the attacking ships, he asserted.

If this method had been followed in the Spanish war he doubted if the insurgent airmen would have caused the damage they did.

Tooth Decay

Physicians Claim To Have Isolated Germ That Causes Trouble

Isolation of the germ that causes tooth decay was reported by Dr. P. H. Bolding, dentist, and his brother, Lieut. L. A. Bolding, physician attached to the naval academy at Annapolis, Md.

The germ is nurtured, they said, in foods made from cereals, mostly wheat, corn and oats. The fermentation of these foods causes acid in the saliva which attacks the tooth enamel. The germ can be eliminated by processing the cereal, they said.

They made their report to the First District Dental Society of the State of New York.

They believed that their discovery might open the way for a new study of the dietary diseases, such as pericarditis, ulcer, gall stones, arthritis, appendicitis, pernicious anaemia and rheumatism.

One way of destroying the germ, they said, was by fermentation or alkalization of the cereal before consumption.

Highway Program

Ontario To Spend Ten Million Dollars On Roads In Next Five Years

R. M. Smith, Ontario Deputy Minister of Highways, announces that during the next five years 283 miles of road from Sudbury to Sault Ste. Marie would be paved at a cost of \$10,000,000.

Mr. Smith was reviewing road construction projects between North Bay and Sault Ste. Marie with Hon. T. B. McQuesten, Ontario Minister of Highways, and A. A. Smith, chief engineer of the Highways Department.

Owing to the exception of three miles between the Veve river and Hagar, grading has been completed between North Bay and Sudbury; James Cooper, M.L.A., Sudbury, who accompanied the party, said.

One roadwork contract was awarded for \$250,000 this year, Cooper added. Another was for \$160,000 and there were various smaller contracts throughout the district.

Industrial arbitration first was employed in the settlement of labor disputes before the French Revolution at Lyons, when controversies arose in the silk industry of France.

Beef and cabbage cooked together comprise the English dish of "bubble and squeak."

According to one London magistrate, "Boxing the ears is the most dangerous way of hitting anyone."

An excellent lubricant for squeaking doors and other parts of a car is a common wax crayon.

NIGHT COUGHING CAN OFTEN BE PREVENTED

If your child often coughs at night because of even a slight cold—do this at bedtime: Thoroughly massage Vicks VapoRub on throat, chest, and back. VapoRub's potent vapors clear, helping to maintain normal breathing through the nose, and so reducing mouth-breathing (the frequent cause of night coughs). Try it tonight—learn for yourself another reason why VapoRub is a family standby in more homes than all other medications of its kind put together.

POOR MAN'S GOLD

Courtney Ryley Cooper

© Courtney Ryley Cooper.
WNU Service.

CHAPTER VI.—Continued

Hammond began to file the ragged edge of a long-handled shovel. Don't you think it's up to us to get as much gold out of that creek placer as we can? We'll have to be hiring men soon."

The older man shot him a quick glance. "That's the fourth or fifth time you've brought that up," he said. "Well?" asked Hammond. "Didn't we talk it over the other night?" "We didn't come to any decision."

"I did."

"That doesn't make two of us."

A certain asperity had grown up between the two looking men. Hammond felt that McKenzie Joe's nature had become steadily sorer ever since the first arrival of Timmy Moon's airplane and its passengers. Jack had resented that, as though it were an implied insult to the girl he loved.

"We Didn't Come to Any Decision."

"Look here, Joe. We've got to get our money out of this discovery. We can't stay here forever."

"Scams to me," McKenzie Joe said, as he looked out over the valley, "when we found this place, we both

TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Pep that Sends You Bounding Up the Stairs

People who smother to death by chronic oxygen lack, have completely set off from them. Just as surely you are slowly smothering if your blood lacks red corpuscles. Red corpuscles are your oxygen-carriers. They carry the oxygen you breathe in to every part of your system. Without enough oxygen-carrying corpuscles, your kidneys, liver, stomach and bowels slow down. Your skin gets pale, flabby, often itchy. Your nerves may become jittery—your eyes quickly—feel depressed.

What you need is Dr. Williams' Pink Pills. These world-famous pills help make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Get Dr. Williams' Pink Pills today at your druggist. Get for yourself how quickly the time-proven blood-builder will help give you back your pep.

Copyright 1928, Dr. Williams' Medical & Surgical Co., Lowell, Mass.

figured it was where we were going to settle down—that we had a life job."

"We're not going to have a year's job, if we don't find that other bed-rock. That Loon creek placer won't be enough for us."

"It's enough for me right now," the older man said. "I ain't ever seen that much money before."

Hammond bent over the shovel blade.

"Our ideas are different there."

"You mean, you've let somebody change 'em for you?"

Hammond threw down the shovel; it clattered on the wooden floor.

"I'm getting tired of that. If you've got anything to say about Ray Joyce, come out and say it."

The other man glanced at him over his shoulder.

"Did I mention any names?" he asked quickly and moved away from the upper diggings, a new test shaft, somewhat distant from camp and deeper in the forest, by which they sought the bedrock.

Hammond did not follow.

Instead, with the shovel over his shoulder, he headed for the placer workings along the creek. It was a rejuvenated camp through which he moved. A year ago, he passed the lake and Timmy Moon's airplane took off for Wrangell. From far away came the sound of hammers over at Around the World Annie's, on the Alaskan side; a tiny town had begun there, she called it Whoopee.

As Hammond walked on, he passed a quiet Sitka spruce, gleaming in a new shawl of wildly checkered design, an importation by air.

Then he became aware that someone was calling him. It was Jeanne Towers, waving excitedly from the edge of her cabin store.

"I've almost sold out!" she exclaimed, as he approached. "I'm going to send in another order tomorrow. Larry Baine, he's the one with the all-metal Junkers, is going to bring me back a whole lot of stuff from Fourcous."

"That's the way a business grows," Hammond bantered. "Two hundred dollars for a claim, doubled all in a couple of weeks."

Jeanne laughed, tipping her home-made gold-acacia with a toying finger. "Well, nearly doubled. I hope I do it again."

"And a dozen times after that. Then I'll know where to borrow if the gold-mining business plays out!"

He went on then, at last to reach Loon creek. Key was not yet there. It was still breakfast time in most of the camp. But Bruce Kenning was moving along the stream, toward one of his claims a quarter mile beyond.

A few hundred yards up the stream, there were rays-boned Olson scoping the earth by great shovelfuls into his sluice, was Mrs. Joyce. Hammond saw her there often; now and then he had found Olson sitting on the veranda of the Joyce cottage, talking of wanderings in many lands in his search for gold, while Mrs. Joyce gave far more than her usual monosyllabic rejoinders. There was something about the man which seemed to fascinate her. Suddenly he ceased his musings. Bruce Kenning had come beside him.

"How's the work going with McKenzie Joe?" he asked quietly.

Hammond shrugged his shoulders. "I haven't been able to get anywhere. He still wants to put down one thing at a time and give the rest of his life to it."

Kenning nodded.

"You can't have that. I'm convinced that the old river bed lies over toward the British Columbia hills," he chuckled. "I wish it were the other way around—all my claims are in the other direction."

Hammond grinned. "Well, you can't say I didn't tell you."

"Oh, you're talking about that stuff I bought from Jeanne Towers. I've added to that a great deal—on the chance that somebody around here would want it. But everybody's looking the other way. Just as well. I'm obligated to turn over some worthless claims to an English syndicate."

"That's beyond me."

"Something I took over out of what was left when Joyce died. I guess he was frankly they probably won't develop the property. They just want something cheap in a live mining camp."

"A stock-selling scheme, probably."

"I haven't much doubt about it. Be glad to lose the thing over."

"So would I!" Hammond felt he could share Kenning's repugnance.

He was fired these days with the thought of new gold, clean money.

The eagerness had been mounting ever since that night when Kay had told him her dream of twenty years for Kay—his hands clawed for gold, his mind was centred upon little else.

"How deep do you think we'll have to go to reach that old bedrock?"

"A lot deeper than you'd imagine—nearly to a hundred and twenty feet. From my study of the strata, I can't see any other answer."

ONLY THE BEST

IS GOOD ENOUGH

This outstanding triumph is proof of quality. Twelve first prizes in twelve classes, in this year's Baby Show at the Toronto and Ottawa Exhibitions, were won by babies fed on Crown Brand Corn Syrup.

What better evidence can there be of the confidence which Canadian mothers and their physicians have in the purity and quality of Crown Brand?

A delicious table syrup. Crown Brand is a treat for the whole family.

Tell the boys that pictures of famous hockey men can still be obtained for Crown Brand. Can Syrup labels.

CROWN BRAND CORN SYRUP
THE PANACEA EXERCISE FOOD
THE CANADIAN STARCH COMPANY Limited

Hammond whistled.

"That means a lot of work."

"You bet it means work and men. And a concentrated campaign. Any other method will keep you here for the next fifty years. You've got to spend money to make money in mining."

"That's what I've been trying to tell McKenzie Joe. But he—"

There he halted. Kay was coming down the trail. Bruce Kenning called good morning and went up the stream. Hours later, with Kay and Hammond watching intently, the workmen began a clean-up of the sluice box on the Joyce claim. It only revealed the usual flour gold indications of something more to come, but as yet, nothing worth saving.

"Neither this flume nor the sluice is long enough," one of the workers complained. "We'd Jim waste as much as we can."

"Well, nearly doubled. I hope I do it again."

"And a dozen times after that. Then I'll know where to borrow if the gold-mining business plays out!"

He went on then, at last to reach Loon creek. Key was not yet there. It was still breakfast time in most of the camp. But Bruce Kenning was moving along the stream, toward one of his claims a quarter mile beyond.

A few hundred yards up the stream, there were rays-boned Olson scoping the earth by great shovelfuls into his sluice, was Mrs. Joyce. "A stock-selling scheme, probably."

"I haven't much doubt about it. Be glad to lose the thing over."

"So would I!" Hammond felt he could share Kenning's repugnance.

He was fired these days with the thought of new gold, clean money.

The eagerness had been mounting ever since that night when Kay had told him her dream of twenty years for Kay—his hands clawed for gold, his mind was centred upon little else.

"How deep do you think we'll have to go to reach that old bedrock?"

"A lot deeper than you'd imagine—nearly to a hundred and twenty feet. From my study of the strata, I can't see any other answer."

Facing The Future

Free Peoples Must Realize That They Have To Protect Their Liberty

The men in the British parliament who are demanding more armaments and speedier production are the true guides of our future policy. The past is past. Our leaders have decided, for good or ill, not to regard the dismemberment of Czechoslovakia as a casus belli. It cannot be revived now, no matter how brutally Hitler's minions behave toward their fallen foes. Still, we may be very sure that the old British rule still stands: "Whatsoever a man soweth, that shall he also reap."

But we must face the future. One must meet a lot of very brave men these latter days since war has been finally averted. One must ask about what should have been done and said at Berchtesgaden and at Munich. They were not so brave when it looked as if war was actually coming. But all free peoples, including our verbally brilliant American friends to the south, should realize today as never before that they must be prepared to defend their liberties if they hope to continue to enjoy them.

Criticism from Canada at this time seems especially pointless. How ready are we to join the forces of the Lord and fight against another Armageddon? Yet if we are not ready and willing to fight, we ought at least to have the becoming modesty to keep our mouths shut.—Montreal Star.

Weather Lore

Expert Explodes Theory About Changes Of Climate

Sir Frederic Stupart, 34 years director of the meteorological service of Canada until his recent retirement, says all the talk about the weather changing through the ages is just so much nonsense. "I've been looking through the records of the Jesuit fathers and the weather then was just about the same as now," Sir Frederic said when reporters interviewed him regarding his coming eighty-first birthday. "About 15 years ago I prepared a paper on 'Is the Weather Changing?' and came to the conclusion that it was not. In records of 2,000 years ago there are evidences the climate in the Holy Land was not very different from what it is now."

There are "fluctuations or pulsations" every so often, he admitted. There was a period of cold winters in the 1870's and a mild spell in the 1890's. The coldest period in the last 150 years was around 1816 and 1818. Sir Frederic was willing, too, to help explode the myth about the groundhog and his shadow. The activity of squirrels and a big nut harvest doesn't mean it will be a cold winter and no one can ever be able to produce a satisfactory rain by shutting the clouds with bombs, he added.

Should Not Be Specialized

McGill Principal Warns Against Too Many Cubby Holes In Education

A warning that the specialization of knowledge, and the separating of it into cubby holes, was not the chief aim of education was given by Principal Lewis W. Douglas in his address at Montreal to the graduating class and other students of McGill at the University Hall Convocation. Dr. Douglas maintained that specialization in education should be carried to such an extent that many were unqualified by reason of the lack of possession of a broad cultural background, to hold that position, and urged his listeners to consider education as the process by which man interprets all divisions of knowledge into a co-ordinated, integrated, unified conception of living.

The Newest Potatoes

Housewives Can Now Have Choice Of Several Colors

Housewives who forever are trying to get something to harmonize with something else can now try the idea on potatoes. The Pennsylvania State Department of Agriculture, thinking perhaps of the women who dote upon a color scheme for the dinner table, is offering a choice of varieties. Red potatoes, pink potatoes, blues, whites, russets, yellows, whites with blue eyes, whites with red eyes, and even purple potatoes that are purple all the way through—like a beet.

The stones and timber of some Japanese temples were hoisted into place by ropes made of hair sacrificed by thousands of women and girls.

Cuts Bronchitis
Mathieu's
Syrup

Employs Only Men

No Women Have Ever Worked For Brighton Firm

There are no flowers on the desks of directors of the business controlled by A. R. T. Perry, decorators' merchant, in Brighton, England, and the south coast.

Why? Because, though Mr. Perry employs more than a hundred men and boys in his showrooms, girl employees have been banned from the business house of Perry for nearly 70 years—from the first day that his father opened the shop in Duke street, Brighton.

Boys answered the telephone, do all the typing, make the office tea. Men show women customers round. And boys do all the office cleaning—even charwomen fall under the ban.

Mr. Perry won't have it that he is prejudiced against girls. He even admits that they can excel men in business.

For 25 years he has been a leader of the Brighton and Hove Battalion of the Boys' Brigade, and it is his ambition to give every boy he can a chance in life.

As captain, commanding officer or vice-president of the battalion, he believes in the doctrine of "Give boys a chance."

His businesses are so organized that he claims no boy can find himself in a blind-alley job. All have a chance of rising to the top.

"My husband finds in his type of business that he is lucky enough to carry on without women. But he likes to see them in the home," Mrs. Perry says.

And Mr. Perry's employees? The sales manager at the Duke street branch said with enthusiasm, "We prefer it this way. We don't in the least mind the feminine touch. We are happier without it."

"A female can be a disturbing influence in business. Without her there is less inclination to waste time. Every one has his own job to do and there is no question of 'Don't do that, let me do it for you'."

"Certainly no flowers on the boss' desk. They'd soon get thrown back if one tried it."

Have Real Problem

Nova Scotia Fishermen Get Very Little For Hard Work

Three Nova Scotia inshore fishermen, after failing from daybreak to noon, landed 423 pounds of fish. The Halifax Herald prints the following report of what happened. For the catch, the fishermen were paid \$3.68.

From the \$3.68 the fishermen had to deduct \$1 for delivery to market, leaving \$2.68 to pay for three men's work, gasoline, bait, and upkeep of boat and gear.

Of the 423-pound catch, 324 pounds were sold to retail customers.

The fishermen paid for those 324 pounds of fish a total of \$30.20.

Housewives paid almost ten times the gross earnings of the fishermen. Whether or not the circumstances in this specific case were exceptional, we do not know. But study of prices paid to fishermen and prices paid by the consumer over a period of some weeks shows a very wide gap indeed.—Maclean's Magazine.

Features Of The Future

New Architecture Will Be Seen At Coming World's Fair

A preview of the style of architecture to be exemplified in the New York World's Fair is provided by the lavish new metropolitan night club, the Riviera. Every interior wall curves on an arc, giving each room an illusion of far greater spaciousness. The main dining room, a huge oval of 6,000 square feet, belies the compact appearance of the building's exterior.

Other "features of the future" are a disappearing 52-ton roof, a receding stage, a revolving stage with colored floor lights, a revolving bandstand for orchestra changes, and sliding glass walls which drop at the touch of a switch and open the huge dining room to the Hudson River's breezes.

A heat meter so sensitive that it will record the effect of a blush has been developed by engineers interested in the proper heating and ventilation of buildings.

A plow which was leaned against a tree on the Leffingwell farm, near Exira, Iowa, more than 50 years ago remains there today, firmly embedded in the tree's trunk.

Pike County, Ark. is the only place in North America where diamonds are found in any quantity.

Dancing, drinking, embracing and kissing are banned on the Japanese screen.

Britain is bidding for the world bicycle trade.

Rheumatism

JUST DO WHAT YOU SEE IN THESE PICTURES TO RELIEVE PAIN QUICKLY

1. Take 2 "Aspirin" Tablets with a full glass of water immediately on first attack of rheumatic or neuralgic pain coming on.

2. You should not expect very quickly. If pain is unusually severe, repeat according to directions.

To relieve pain of rheumatism or neuritis quickly, try the "Aspirin" way—shown above.

People everywhere say results are remarkable. "Aspirin" Tablets are economical, which makes the use of expensive "pain remedies" unnecessary.

If this way fails, see your doctor. He will find the cause and cure it. While there, ask him about taking "Aspirin" to relieve these pains. We believe he will tell you there is no more effective, more dependable way normal persons may use.

Demand and Get "ASPIRIN"
TRADE-MARK REG.

250 Historic Sites

Marking Stirring Events In The History Of Canada

More than 250 monuments and tablets have been erected throughout Canada during the past 16 years to mark points of historic interest which have been declared by the Historic Sites and Monuments Board of Canada as being of outstanding national importance.

An honorary advisory board, the Historic Sites and Monuments Board, composed of recognized historians, co-operates with the National Parks Bureau and the Department of Mines and Resources in the marking and preservation of historic sites, and from the Atlantic to the Pacific stirring events in the history of Canada are recalled by tablets and monuments erected by the government.—Canadian Resources Bulletin.

Plenty When It Came

Oklahoma City Suffered A Flood After Water Shortage

It was tough when Disney, Oklahoma, was without water. It was just as tough when water came. Short of supply since mid-July, residents left their faucets open constantly to catch every drop that entered the mains. City engineers found a good flow, hooked it on without notice. The new water supply boomed into the mains, the faucets, the homes. Disney suffered a flood.

Promoter: "There are two sides to every question."

Prospect: "Yes, and there are two sides to a sheet of fly paper—but it makes a lot of difference to the fly which side he investigates."

On the Malay Peninsula, bees make honey but do not eat it; they live on nectar in the year round, and they use honey accumulates in great masses.

Wales has banned the tacking of notices on trees.

MUSCULAR PAINS—ACHES

It takes more than "just a salve" to bring relief. It takes a "counter-irritant" like good old Musterole—soothing, warming, penetrating and helpful in quickly overcoming the local congestion and pain when rubbed on the aching spots.

Muscular lumbago, soreness and stiffness generally yield promptly. Better than the old-fashioned mustard plaster. Musterole has been used by millions for 30 years. Recommended by many doctors and nurses. Made in Canada, in three strengths: Regular, Children's (mild), and Extra Strong. All druggists, 40¢ each.

A. L. Smith, K.C., well-known Cal- manager of Canmore Coal Co., who was here on Monday (came in with Mr. C. E. Stockhill's car) and was accompanied on early in the latter's private car on his return by R. M. Young, general train 12 on Monday afternoon.

Graceful Dancing Team of Polish Youth Club

Members of the Polish Youth Club, of Coleman, who have taken part in Polish National Dances in Coleman, Bellevue, Lethbridge and Calgary, under direction of Miss Mary Rypien. From left to right: Mrs. L. Moore (nee Miss Rosie Kull), Miss Mary Rypien, Miss Annie Kullig, Miss Emily Rypien, Miss Wilhelmine Michalsky, Miss Milly Spiveak, Miss Mary Trosz, Miss Carolina Yurasek, Miss Lillian Supit, Miss Amelia Rypien, Miss Violet Sapeta, Miss Helen Rypien. — Photo and Engraving by Gushul Studio, Blairmore, Alberta.

Mary Rypien heads the dancing girls, and instructs them in the intricate movements of these dances which on various occasions have brought pleasure to people of the Pass towns. The Polish Youth Club meets at the hall in East Coleman, which is a community centre for the young people, as well as the older. The girls have been asked to go to Rosedale, Drumheller, to give a program on Nov. 11. Mary Rypien is president and Bruno Pytlarz is secretary of the club.

Enjoyable Dance Aspires Masonic Lodge

Starting the winter dance season with vim and enthusiasm, the annual dance of Summit Lodge A. F. & A. M. was attended by many visitors from the Pass towns, including Natal and Michel, last Friday night. Supper was served by the ladies of Minerva Lodge, O.E.S., in the community hall, the dance being held in the Italian hall. The committee deserve congratulations for the success of this social affair.
